

DATASHEET

Patchpanel 19 Zoll 1Unit, 24-Port, black, w/o Keystone

General data

EFB-Elektronik Patch Panel: modular & practical

The high-quality, black-coloured patch panel from EFB-Elektronik allows an individual and structured assembly of up to 24 keystone modules. The individual modules are mounted without tools by simply snapping them into place, the ports of the patch panel are numbered accordingly. The black port panel fits perfectly into a 19" server or equipment cabinet, where it takes up only one height unit. Because of two mounting holes on each side, installation of the jack panel is easy.

The EFB-Elektronik 19" patch panel is made of sturdy sheet steel, the surfaces are robust and durable due to a scratch-resistant powder coating. The color of the patch panel is black.

What are the advantages of a black patch panel by EFB-Elektronik?

Patch panels are an important part of IT infrastructure. Using a 19 inch patch panel from EFB-Elektronik has many advantages, so the return on investment is considerable. The most important advantages of using patch panels include:

DATASHEET

Patchpanel 19 Zoll 1Unit, 24-Port, black, w/o Keystone

- **Scalability:** After installing a patch panel, you can easily add new devices without having to run new cables.
- **Less cable clutter:** Patch panels are usually located closer to the actual devices. This makes it possible to use a shorter patch cable.
- **Inexpensive:** The high-quality patch panels by EFB-Elektronik are sturdy and still come at a reasonable low price.
- **Lower cable costs:** With a patch panel, you can use shorter cables that cost less than longer ones.
- **Easier maintenance:** If you ever need to run a test cable, test a port, or perform other common maintenance tasks, you can do it faster and easier.

Allgemeine Daten

With buses/couplings	False
Number of height units	1 U
Type of plug-in connector system	Keystone

General data

EMC-version	False
Height	44.2 mm
